Professional Summary

Developer with 1 year of experience in AI at Wise Systems, building solutions with LLMs and integrating them into software systems, alongside Machine Learning. IBM-certified in RAG and Agentic AI (10 courses), with strong command of RAG pipelines with vector databases, autonomous and collaborative agents, multi-agent architectures, and the Model Context Protocol (MCP).

Information Systems undergraduate at PUCPR, using Python and FastAPI as a back-end foundation and Angular on the front end. Organized, communicative, and disciplined, with business vision and a collaborative mindset. Participated in state- and national-level math olympiads.

Technical Skills

- LLMs and Generative AI: prompt engineering, function calling, multimodal applications
- RAG: vector databases, retrievers, retrieval-augmented generation pipelines
- AI Agents: LangChain, LangGraph, CrewAI, AutoGen, BeeAI, MCP, multi-agent architectures, memory and feedback
- **Machine Learning: scikit-learn, pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook**
- Back-end and APIs: Python, FastAPI, RESTful APIs
- Front-end: Angular
- **DevOps and Cloud: Git, GitHub, Docker, Jenkins, AWS**

Professional Experience

Wise Systems – Junior Software Developer (AI)

Curitiba, Paraná · August 2025 – Present (Trainee since August 2025; Junior since November 2025)

- Development of LLM-based solutions and integration of these tools into systems
- **Application of Machine Learning (scikit-learn, pandas, NumPy) together with LLMs**
- Development with Python and FastAPI, with Angular on the front end
- Use of Git, GitHub, and Docker in the development workflow

SignoTech – Software Development Intern

Curitiba · January 2025 – June 2025

- Development of RESTful APIs, with Docker and MySQL

Certifications

IBM RAG and Agentic AI – Professional Certificate (IBM / Coursera)

Completed on September 11, 2026 · 10 courses · verify certificate

- Develop Generative AI Applications: Get Started
- Build RAG Applications: Get Started
- Vector Databases for RAG: An Introduction
- Advanced RAG with Vector Databases and Retrievers
- Build Multimodal Generative AI Applications
- Fundamentals of Building AI Agents
- Agentic AI with LangChain and LangGraph
- Agentic AI with LangGraph, CrewAI, AutoGen and BeeAI
- Build AI Agents using MCP
- RAG and Agentic AI Capstone Project

Other Courses

- Python Course: Beginner to Advanced
- Git and GitHub Essentials for Developers
- MongoDB: Beginner to Advanced (with Mongoose and projects)
- Wise Start 6.0 Training and Selection Program

Education

Pontifical Catholic University of Paraná (PUCPR)

Information Systems · March 2024 – November 2027 (expected)

Languages

- Portuguese: native
- English: Full Professional proficiency
